

<http://digg.com/video/scott-aukerman-and-lizzy-caplan-debate-whether-or-not-men-can-be-funny>⁴

Here is the max patch with calibrated 16 channel ambi~ and 3 calibrated trackers.

files:

"MarcosAlexisMaudCosm" - motive file on tracker PC desktop

Trackers:

It is tuned and ready to go. It has 3 calibrated trackers named:

persona

personb

personc

Motive:

There is a Motiv file on the desktop named "MarcosAlexisMaudCosm" that goes with it.

-Launch Motiv.

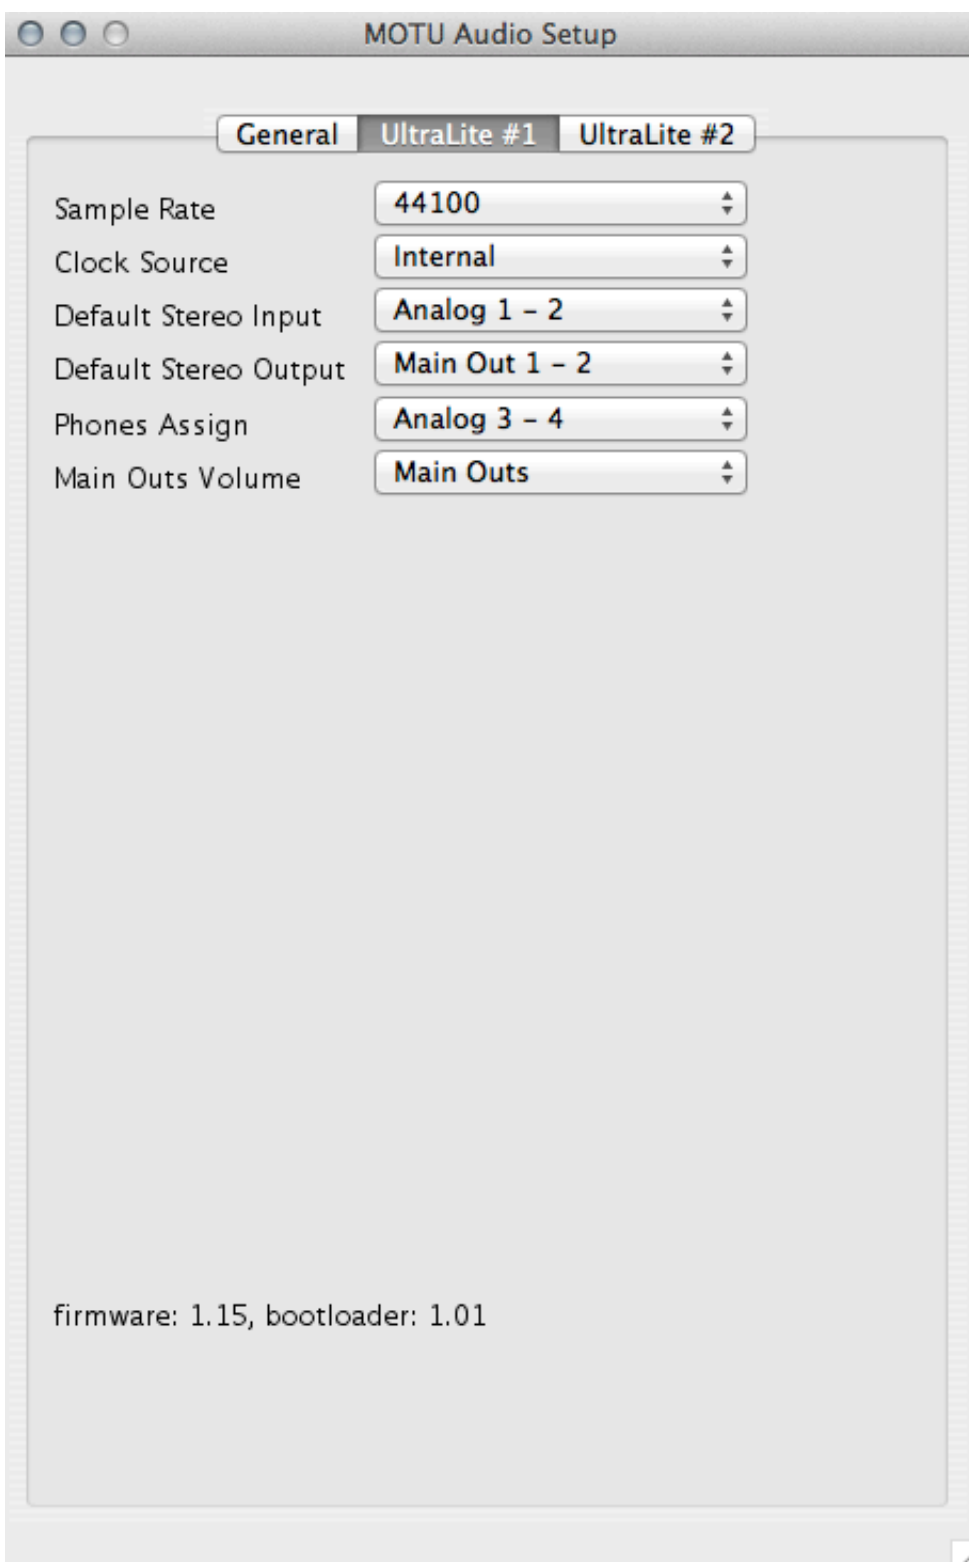

-Open an existing project.

-Select "MarcosAlexisMaudCosm" from the desktop.

The 3 trackers are on the podium in the center of the room.

Max:

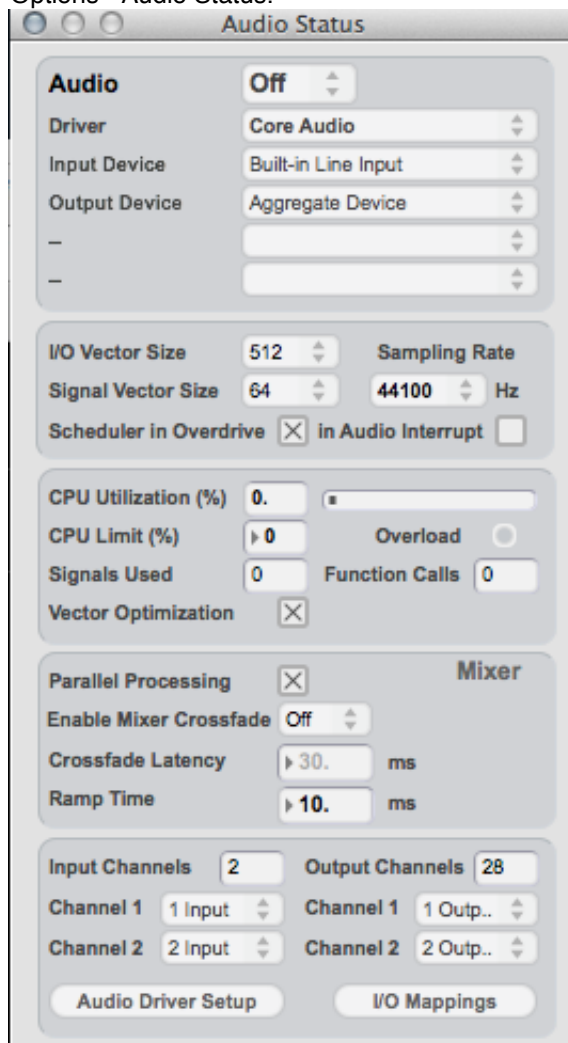

-Make sure both motu's are on. Should look like this:

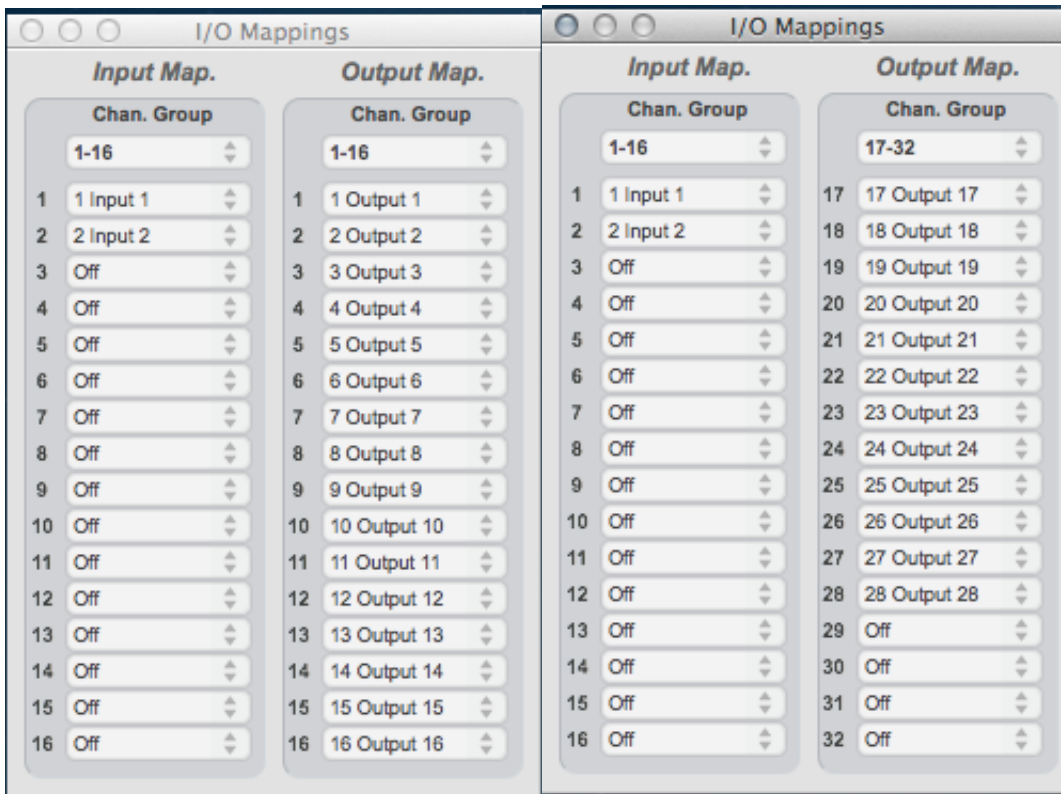

-Launch Max.

-Options - Audio Status.

-Make sure Aggregate Device is selected as output device.

-Make sure I/O mappings are as follows:

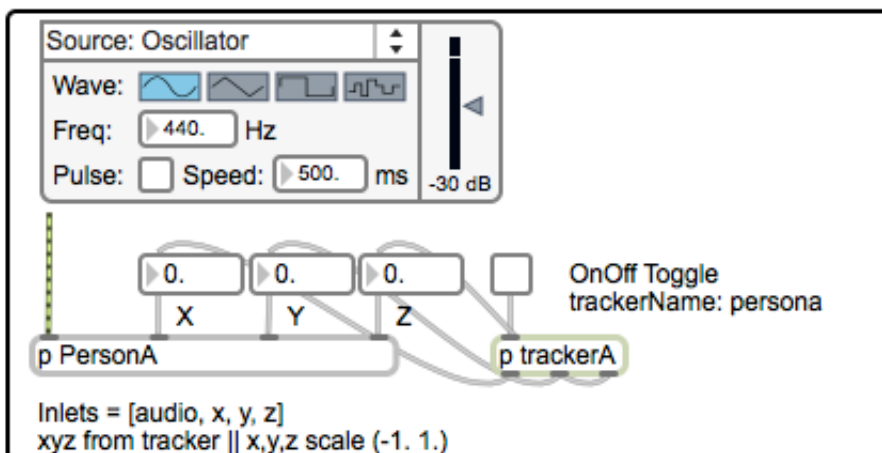

-Open the max patch "transLAB-CosmAmbi16wTrackerMarcosAlexisMaud".

-Drag the cosm window to projectors, press 'esc' key for fullscreen.

-Click big toggle to begin rendering.

-Click toggles next to each units to receive tracking data...

****Make sure you are sending data from Motiv, *this should automatically turn on when motive file is opened.**

-Adjust global volume.

-the subs are at the bottom to address individually.

-Put in your own sounds in far left inlet of PersonA, PersonB, PersonC.

-Move around in cosm with up-down-side arrows and w,d,a,x, keys.

Have fun!

fM
